Buckingham, Polack, and Smith Join Triterra

LANSING, MI – OCTOBER 12, 2012: Triterra, a Lansing-based Environmental Consulting Firm, recently added three additional staff members.

J.P. Buckingham brings 13 years of experience in the manufacturing industry and environmental consulting. Nine of the 13 years has been spent working with property owners, banks, developers, construction companies, real estate agents and communities deal with the challenges associated with acquiring and developing property. JP currently serves as the Director of Due Diligence and Brownfield Services. His responsibilities include managing Phase I/II Environmental Site Assessments (ESAs), Baseline Environmental Assessments (BEAs), Due Care Plans and building inspections associated with property transactions; developing Brownfield redevelopment plans; preparing grant applications; and supporting business development.

Martin Polack has more than 25 years in technical sales and currently serves as the Business Development manager for Triterra. His responsibilities includes forging new business clients/partnerships, managing existing client relationships, and developing new marketing strategies that support Triterra’s mission. Martin has exceptional procedural skills that are delivered with a focus on teamwork. He is an effective communicator with the ability to explain complex and technical issues clearly and match our professional staff with our client’s issues. He also maintains long term relationships with accounts throughout the mid-Michigan area.

Ian Smith, PhD has more than 12 years of experience in scientific/engineering research and development, publication, environmental safety, and hazardous waste management. His expertise in materials science allows him to apply a wide range of analytical and problem-solving skills to ongoing and upcoming Triterra projects. Ian currently serves as a Material Scientist/Environmental Specialist with Triterra. In addition, he currently is a licensed Asbestos Inspector and is a certified Residential/Commercial Mold Inspector. He regularly provides due diligence services, such as Phase I/II Environmental Site Assessments (ESAs), Baseline Environmental Assessments (BEAs), building inspections, and indoor air quality assessments for property transactions. Ian routinely assists with free product recovery and soil/groundwater sampling activities. Evaluation of data and report writing also comprise a significant portion of his time.

Triterra is a professional environmental consulting firm that specializes in brownfield development, environmental consulting, and natural resource management services. Triterra is dedicated to improving the quality of life within the community by offering a full range of consulting services to effectively and efficiently meet client's needs. For more information on Triterra, please contact us at (517) 702-0470 or visit our website, www.triterra.us.
