

# TRITERRA

SPRING

2nd Quarter 2017

WE ARE HONORED TO HAVE BEEN CHOSEN

**LANSING REGIONAL CHAMBER OF COMMERCE'S  
OUTSTANDING SMALL BUSINESS OF THE YEAR**

## **PRACTICAL & CREATIVE ENVIRONMENTAL SOLUTIONS**

Triterra specializes in brownfield redevelopment, environmental consulting, and natural resource management services. Our aim is to be one of Michigan's premier environmental consulting firms...while maintaining our "boutique" atmosphere. That means: 'big' in terms of the quality we offer, but small enough to continue to provide the attention our customers deserve. Our team is dedicated to providing services that are tailored to the best interests of our client.

**IT'S NOT JUST WHAT WE DO;  
IT'S WHO WE ARE AND HOW WE DO IT.**

## PROJECT HIGHLIGHT

### The Montgomery Drain Project Lansing, Michigan

Triterra is conducting a stormwater quality assessment of the Montgomery Drain Drainage District on behalf of the Ingham County Drain Commissioner. The Montgomery Drain, located in a mixed residential and commercial area in Lansing, East Lansing, and Lansing Township, discharges stormwater to the Red Cedar River. Triterra has performed sampling and continuous monitoring of stormwater runoff from the district for nearly two years to develop an understanding of the water quality and flow characteristics prior to construction improvements to the drain. Triterra's assessment is being used by the project's comprehensive team of professionals to design an innovative stormwater treatment system. The treatment system aims to improve water quality and reduce flooding, while restoring the intended uses of the runoff by providing wildlife habit and a recreational destination for visitors and residents.

### Meet Meredith Crane

Meredeth is one of our hard-working Environmental Scientists.

Meredeth joined our team in 2015. Her primary responsibilities include completing wetland delineations, various storm water management activities, sediment sampling, and other water quality evaluations as part of our Natural Resource Management Services.

Additionally, Meredith has become an integral part of our Environmental Due Diligence team and also maintains her State of Michigan Asbestos Inspector accreditation.

Meredeth most likes the "boutique feel" of Triterra, the community-based, personal relationships we have with clients, and that "our clients can have real conversations with us."
